Hi Brian,

I did indeed receive your info. I forwarded the materials to all interested parties and am now awaiting their replies. Since some folks will be out of the lab for the next week, it may be couple of days before I can coordinate things. Also, I just want to remind you that our interest in your plate pourer is contingent upon selection of a colony picker. As I mentioned to you earlier, the Mantis by GeneMachines is, so far, our first choice. Thanks for your time and I will be in touch soon.

Hello Boris, Did you get the info we emailed you on Friday? Please call, and arrange a time to come up and see us. I talked to our team, and we could look into the wells and look for crystals (first stage) with our current system. Regards, Brian L. Ganz President/CEO of RoboDesign (760)438-5282 office
